Full Stack · HTML · CSS · JavaScript · Reactjs · MongoDB · NodeJS · ExpressJS · Python · Flutter

PERSONAL PROJECTS

Personal-Portfolio ⬈
• A website using the React framework, showcasing my professional accomplishments. The website serves as an online representation of my skills, experience, projects, and provides a platform for me to showcase my talent to potential employers, clients, or anyone who may be interested in my work.

Workout-Buddy ⬈
• Workout-Buddy is a web-based application that allows users to track and record their workouts. It is built using the MERN (MongoDB, Express, React, and Node.js) stack, which provides a comprehensive and efficient solution for web development. With Workout-Buddy, users can create workout routines, log sets and reps, track progress over time.

Chat-App ⬈
• Chat-App is a real-time messaging application built using React, a popular JavaScript library for building user interfaces. The app enables users to communicate with one another in real-time through a chat interface.
